

## **Indiana State Data Center**

Indiana State Library  
(317) 232-3733

### **Who We Are:**

The Indiana Data Center Program is a federal and state cooperative between the Census Bureau and the State of Indiana, coordinated by the Indiana State Library, the Indiana Business Research Center, and the Indiana Department of Commerce. It provides demographic and economic statistics from the Census Bureau, other federal agencies, and state agencies, dating from 1790 to the present.

### **What We Have:**

- Current and historical data from the Federal Census Bureau, as well as the Bureau of Labor Statistics, the Bureau of Economic Analysis, the FBI, the Department of Health and Human Services, and more.
- Access to Indiana state agencies' statistics on social and economic data including crime, welfare, child support, child abuse and neglect, birth and death rates, unemployment, income, agriculture, gaming, elections, and other topics.

### **What We Do:**

- Answer questions on any topic related to statistical information in Indiana or the United States.
- Provide training and technical assistance in accessing and using all types of data, especially Census data, using CDs/DVDs, and the Internet.
- Provide access to redistricting software for redistricting political entities, schools, counties, cities and towns, townships, or other geographic areas. Maps and population data can then be printed for districts.
- Provide information and technical assistance through a statewide network of 60 Data Center affiliates located in planning agencies, libraries, chambers of commerce, and other organizations.
- Provide census tract, block, and urbanized area maps (36" x 34") for \$5/map sheet.
